1. Introduction

Digital storytelling combines various types of multimedia images, music, narration, text and video clips to make a story that is appealing and interesting to a digital reader (EDUCAUSE Learning Initiative, 2007) and is increasingly used in teaching and learning ([Learn more about ComPDFKit](https://www.compdf.com/)).

«» Digital storytelling has the potential to influence the student audience and help them ‘make better meaning’ from the content they are exposed to. This report will discuss the potential and limitations of digital storytelling along with some fundamental technical information. It will then focus on one journal article that investigates the use of digital storytelling in language learning contexts.
